

## CASE STUDY

### SHAWX MANUFACTURING

“ We offer an all Australian made and manufactured product using Australian steel thanks to Bisalloy. We enjoy the interaction with Bisalloy staff, there is always stock available at our distributor, and understand there is technical backup if we need it. - Brett Shaw ”

#### EJECTX CHANGING THE WAY MATERIAL IS MOVED

Better productivity, improved safety

ShawX Manufacturing is an all Australian earthmoving equipment and manufacturing company based in Queensland. They provide 100% Australian, premium quality earthmoving equipment to the industry, with a focus on earthmoving buckets and attachments as well as trailers, tipping bodies and their very own EjectX Ejector body.

Brett Shaw, Director at ShawX Manufacturing commented “we pride ourselves on being an Australian owned family business. We offer an all Australian made and manufactured product using Australian steel thanks to Bisalloy. We enjoy the interaction with Bisalloy staff, there is always stock available at our distributor, and understand there is technical backup if we need it”.

ShawX Manufacturing have been using Bisalloy Steels since they expanded into custom equipment manufacturing five years ago. Using predominately BISALLOY® WEAR 450 and BISALLOY® STRUCTURAL 80, this has enabled the production of longer-lasting, lighter-build products for their customers and produces an all-round better product to the market.

Bisalloy Steels is Australia’s only manufacturer of high strength and high hardness quenched and tempered steel. Bisalloy has been proudly producing for the Australian mining market for over 40 years.
